# NFEC FIRE SAFETY SEMINAR 2025

26 August 2025, Singapore Expo, Garnet Room Level 2

## ABOUT SEMINAR

NFEC Fire Safety Seminar 2025 is dedicated to enhancing fire safety and emergency preparedness in the workplace. With this year's theme of "Learn; Apply; Share," the seminar's goal is to empower participants with the knowledge, skills, and resources necessary to prevent fires and effectively manage emergencies and crises.

Our seminar objectives are clear: to prepare and equip all participants with the necessary knowledge to prevent fires and handle emergencies in the workplace. Through engaging presentations and insightful discussions, attendees will gain valuable insights into fire safety best practices, emergency response strategies, and crisis management techniques.

At the heart of our seminar is the recognition of the importance of making the workplace fire-safe for all. We understand the critical role that effective fire safety measures play in protecting lives, property, and businesses. Therefore, our sessions will focus on practical solutions, innovative approaches, and industry standards to ensure workplace safety and compliance with fire regulations.

Throughout the seminar, participants will have the opportunity to learn from industry experts, share their experiences and challenges, and apply their newfound knowledge to real-world scenarios. By fostering collaboration, networking, and knowledge exchange, we aim to create a supportive community committed to creating safer working environments for all.

Join us at the NFEC Fire Safety Seminar 2025 as we come together to learn, apply, and share our collective expertise in fire safety and emergency preparedness. Together, let's make a difference and ensure the safety and well-being of everyone in the workplace.

## SEMINAR OBJECTIVES

- To prepare and equip all participants with the knowledge to prevent fires and handle emergencies and crisis at the workplace.
- To highlight the importance of making the workplace fire safe for all and the role of the fire safety managers in making this a reality.
